

« FAST- PASS » : A NEW SYSTEM FOR EVERYONE'S SAFETY

In order to ensure the safety of all of our patients, families and staff, a new security visitor management system which rapidly identifies, captures and logs visitors has been put in place. The objective of this « Fast-Pass » system is to:

- Provide an even safer environment for all
- Offer clear identification of all visitors including but not limited to short term vendors, contractors, service providers
- To be able to track who is in the building at all times

On your next visit, you will be asked for identification. This system requires all visitors over the age of 14, to provide a driver's license or other form of photo ID. A photo will be taken and reproduced on the identification tag that all visitors will be required to wear throughout their time at the hospital. This identification tag has an expiry date. It is expected that the time will add 15 seconds to your registration time at your first visit and much less subsequently. Please prepare and provide your driver's license or photo id in order to make the process as fast as possible at the front desk. We appreciate and thank you for your collaboration.
